Set on both sides of the Inn River, Kufstein is located in the lower Inn River Valley and only a few kilometers from the Alpine foothills in Bavaria.
**Welcome to Kufstein**

**AUSTRIA BASIC FACTS**

**Total area:** approx. 84,000 km². **Population:** 8.1 million. **Capital:** Vienna. **Languages:** German; English is by far the leading foreign language and is widely spoken and understood. **Topography:** The landscapes in Austria range from Alpine peaks to broad river plains. Austria’s highest mountain is the Großglockner (3,797 m); its longest river is the Danube.

Kufstein is surrounded by high mountains which present a breathtaking panorama. The contrast between the historic old town, the fortress and the nearby mountains strongly contribute to the atmosphere and attraction of Kufstein. Thus the city’s nickname is “The Pearl of the Tyrol”. Austria welcomes students from abroad. If you are a national of a European Union (EU) country or Switzerland, you only need a valid passport.

**The History of Kufstein**

“The Pearl of the Tyrol”

There are still countless old buildings which bear witness to the medieval times when Kufstein was first given the rights of township. Lovingly restored, they invite the visitors to imagine for themselves what it must have been like 700 years ago. The mighty fortress in the center shows how important the position of Kufstein was in those days. The battles offer a panoramic view far beyond the town’s boundaries and the ancient buildings entice visitors to explore their towers and vaults. Originally owned by the bishops of Regensburg, the fortress was first mentioned in official documents in 1205. Later, these bishops shared ownership of the hilltop complex with the Bavarian dukes. From 1313 onwards, the Kufstein Fortress belonged to the dukes of Bavaria. In 1415 Duke Ludwig II enlarged the fortification. In 1504 Emperor Maximilian I besieged and conquered Kufstein and had the fortress rebuilt and expanded. In the 17th century, the complex once again underwent additional construction work. In 1703 and 1805 the Bavarians conquered the fortress. Then, in 1814, it fell back into Austrian hands and has belonged to the town of Kufstein since 1924. An impressive part of the fortress is one of the most beautiful open-air stages in Austria which is frequently used for concerts of all sorts. Within the fortress compound is also the world’s largest open-air organ which fills the city with music every day at midday. However, Kufstein is not only interesting for visitors keen on history and culture; the town is also a well-known commercial center. There are quite a few companies that have helped to establish Kufstein’s economic importance, for example: Riedel, a maker of creative glassware; Kneissl, the first ski manufacturer in Austria; and Simmerwerke, a producer of high-tech sealing rings.

European Credit Transfer

WHAT DOES ECTS MEAN?
ECTS STANDS FOR “EUROPEAN CREDIT TRANSFER SYSTEM”.

ECTS is a pilot project of the Erasmus Program (European Community Action Scheme for the Mobility of University Students). One of the main aims of Erasmus is the promotion of academic recognition throughout the European Union to allow students to circulate freely between the member states.

What does ECTS offer to the students?
Students from the ECTS Program will receive full recognition for all academic work successfully carried out at the ECTS partner institutions. They will be able to transfer these academic credits from one participating institution to another.

How does ECTS work?
ECTS is a decentralized system based on the principle of mutual trust and confidence between the participating higher education institutions. Each ECTS department has agreed to break down the description of the courses it offers into small units in order to facilitate the allocation of credits to incoming students.

What are the key features of ECTS?
• ECTS is based on the principle that 60 credits measure the workload of a full-time student during one academic year. The student workload of a full-time study program in Europe amounts in most cases to around 1,500 - 1,800 hours per year and in those cases one credit stands for around 25 - 30 working hours.
• Credits in ECTS can only be obtained after successful completion of the work required and appropriate assessment of the learning outcomes achieved. Learning outcomes are sets of competences, expressing what the student will know, understand or be able to do after completion of a learning process, long or short.
• Student workload in ECTS consists of the time required to complete all planned learning activities such as attending lectures, seminars, independent study, preparation of projects and examinations.
• Credits are allocated to all educational components of a study program (such as modules, courses, placements, dissertation work, etc.). They reflect the quantity of work each component requires to achieve its specific objectives or learning outcomes in relation to the necessary to successfully complete a full year of studies.
• The performance of the student is documented by a local/national grade. It is good practice to add an ECTS grade, in particular in case of credit transfer. The ECTS grading scale ranks the students on a statistical basis. Therefore, statistical data on student performance is a prerequisite for applying the ECTS grading system. Grades are assigned among students with a pass grade as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Definition</th>
<th>Performance</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>very good</td>
<td>100 - 90 %</td>
</tr>
<tr>
<td>2</td>
<td>good</td>
<td>89 - 60 %</td>
</tr>
<tr>
<td>3</td>
<td>satisfactory</td>
<td>59 - 30 %</td>
</tr>
<tr>
<td>4</td>
<td>sufficient</td>
<td>69 - 60 %</td>
</tr>
<tr>
<td>5</td>
<td>fail</td>
<td>59 - 0 %</td>
</tr>
</tbody>
</table>

A distinction is made between the grades FX and F that are used for unsuccessful students. FX means: “fail - some more work required for passing” and F means: “fail - considerable further work required”. The inclusion of failure rates in the Transcript of Records is optional.

What are the key documents of ECTS?
• The regular Information Package / Course Catalogue of the host institution is to be published in the local/national language and in English (or only in English for programs taught in English) on the Web and/or in hard copy in one or more booklets. The Information Package / Course Catalogue must contain the items of the checklist including information for visiting students from abroad.
• The Learning Agreement contains the list of courses to be taken with the ECTS credits which will be awarded for each course. This list must be agreed to by the student and the responsible academic body of the home institution. In the case of credit transfer, the Learning Agreement has to be agreed to by the student and the two institutions concerned before the student’s departure and updated immediately when changes occur.
• The Transcript of Records documents the performance of a student by showing the list of courses taken, the ECTS credits gained, local or national credits, if any, local grades and possibly ECTS grades awarded. In the case of credit transfer, the Transcript of Records has to be issued by the home institution to outgoing students before departure and by the host institution for incoming students at the end of their period of study.

What is the Diploma Supplement (DS)?
The Diploma Supplement is a document attached to a higher education diploma providing a standardized description of the nature, level, context, content and status of the studies that were successfully completed by the graduate. The Diploma Supplement provides transparency and facilitates academic and professional recognition of qualifications (diplomas, degrees, certificates).

For more information on the DS please see the following website: http://europa.eu.int/comm/education/policies/rec_qual/recognition/diploma_en.html

LANGUAGE COURSES
Whereas most of the regular courses held at FH Kufstein Tirol are taught in German, the courses of the International Program are all held in English. International students have the possibility to take German language courses as part of their academic program.

As the FH Kufstein Tirol puts an emphasis on internationality, several other languages are taught as well and are offered at low cost by a special program called Michelangelo. Students may choose English, Spanish, Italian, French, Chinese, Arabic, and others.

For further information, please contact michelangelo@fh-kufstein.ac.at.

On the agenda: winter in Tyrol. On the one side of student life there are rigorous classes and internships; on the other, recreation and fun. Winter life in the Alps is all about frozen waterfalls, pristine snow-covered mountainsides, challenging ski slopes, exciting boarder parks, endless cross-country ski trails, and the magic of the cozy mountain inns. Nearby ski areas are Westendorf, Itter, Hohe Salve, Kitzbühel, and many others.
The demands placed on the mind by intensive study can be easily balanced by participating in regular recreational activity. For students in Kufstein there is an extensive range of summertime leisure activities to choose from: from water sports on nearby lakes and rivers, running, mountain biking, and climbing to outdoor concerts, readings, and festivals.
Kufstein is conveniently situated at one of Europe’s most important North-South axes and can therefore easily be reached by car (www.falk.de) or train (www.oebb.at).

By car:
Take the motorway (Autobahn) exit “Kufstein Süd” or “Kufstein Nord” and follow the signs “Zentrum” (city center). Then follow the signs “Fachhochschule Kufstein”. Public parking can be found in the vicinity.

By train:
Most trains stop in Kufstein. The FH is only a 10-minute walk from the station.

By plane:
The closest airports are Munich in Germany (approx. 130 km), as well as Innsbruck (approx. 75 km) and Salzburg (approx. 100 km) in Austria.
